

**INLITE**

The HERO and MRX series of LED light sources adopts the latest advancements in LED technology from industry leaders such as Lumileds.

New developments such as Sunset DIM and Freedom from Binning™ are at the forefront of LED technology development and are introduced here in a series of products optimised to deliver performance from high system efficiency to high lumen package options.

# HERO SERIES

## CONSTANT COLOUR PROFESSIONAL SERIES

The Hero PRO series is a constant colour light source with high efficiency lensed optics to deliver optimal efficacy and precise beam control

SUPER HERO PRO

# SUPER HERO PRO

The Super Hero Pro LED lamp uses lensed Luxeon T and Luxeon TX LED chips, delivering 1135-1170lm at 650mA and up to 1450-1500lm at 850mA at Ra80+. Luxeon T and TX LED chips are 'binless,' meaning guaranteed colour consistency throughout the lifespan of the chip. Lensing ensures optimal efficiency of delivered lumens and a range of beam control options. Super Hero Pro is delivered with a Diginet LED power supply with a power factor of 0.95 and 4W of losses.

Diginet power supplies are designed in Australia specifically for compatibility with Australian electrical installations and are available with phase or DALI control options. Power supplies include a thermal monitoring system, which will cause the lamp to dim when ambient temperatures exceed 50 degrees, thus ensuring the 50 000hr product lifetime. Super Hero Pro comes with a standard 5 year product warranty.

The MRX LED lamp with Sunset Dim functionality uses patented hybrid mirror reflector optics and combinations of Luxeon LED chips to deliver up to 1100lm at 850mA with Ra80+ in a package which follows the dimming curve of a traditional halogen lamp. As the lamp is dimmed, intensity and colour temperature of light is adjusted proportionately in order to deliver the functionality of halogen light sources ideal for hospitality and residential environments.

MRX is delivered with a Diginet LED power supply

with a power factor of 0.95 and 4W of losses. Diginet power supplies are designed in Australia specifically for compatibility with Australian electrical installations and are available with phase or DALI control options. Power supplies includes a thermal monitoring system, which will cause the lamp to dim when ambient temperatures exceed 50 degrees, thus ensuring the 50 000hr product lifetime. MRX comes with a standard 5 year product warranty.

# SUNSET DIM

## SUNSET DIM V 50W HALOGEN CCT CURVE

Sunset DIM is patented technology which reduces both the luminous intensity and colour temperature of the light source when dimmed.

Colour temperatures range from 2900°K to 1800°K over the dimming range of 100% - 0%. This is achieved through the use of 3 different kinds of LED types (ultra high power density LED chips from premium chip manufacturer Lumileds) and 4 different LED colours for a consistent colour match to MR16 halogen light sources, while patented optics present the visual appearance of conventional MR16 halogen lamps.

In addition to this, phosphor conversion

technology holds the CRI high throughout the brightness range and keeps the colour consistent across a wide range of operating temperatures. "Step-less" colour changing delivers a smooth and continuous change of colour throughout the brightness range, consistently from 100% down to 0% of maximum intensity.

Sunset DIM operates with conventional phase control or DALI control gear from Diginet.

Sunset DIM is employed in the Hero MR LED source, ensuring both the visual appearance and functionality of the traditional halogen reflector lamp.
